Animal Habitats.

Name.

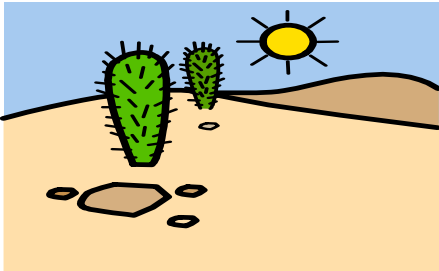

Animal habitats.

Animals and birds at the zoo come from different "Habitats".
Name the habitats below and for each one name a zoo animal or
bird which lives their.

1. _____

Claws, Beaks, Feet and teeth.

Look at the food below and name an animal that eats it.

Homes in Danger.

Many animal homes and habitats are in danger. We chop down forests, pollute seas and build towns and cities. Many animals are now rare or in danger of becoming extinct. Draw a picture below of an animal or bird that is in danger.
